Phase 2 Updated EER | CS 6400 - Fall 2019 | Team 56

Modifications based on Phase 1 feedback:

- Added attributes *'First_name'* and *'Last_name'* to replace 'name' as part of composite attribute *'Primary_contact'* of entity **BUSINESS CUSTOMER**.
- For entity **VEHICLE**, removed attributes *'Manufacturer'* and *'Vehicle Type'*. Created new entities **MANUFACTURER** and **VEHICLETYPE** and they are both related to **VEHICLE**. They have identifying attributes *Manufacturer_Name'* and *'Type_Name'*, respectively.
- Created new relation between **LOAN** and **CUSTOMER** entities.
- Re-worked on **PARTS ORDER** related EER components according to the feedback. Now, **PARTS ORDER** is an entity with relationship to **VEHICLE**, and it has relations to **VENDOR** and **PARTS** entities as well.
- Corrected the cardinality for Checked In By and Sold By relationships; added total participation for **VEHICLE** entity in CheckedIn By relationship.
- General layout and cosmetics improvements.
